

Forged Note Detector

When most counterfeit bank notes are placed in the Money Detector they will immediately fluoresce a vivid blue colour.

The watermark will be CLEARLY VISIBLE and the metallic strip will be shown on BOTH sides of the note as a CONTINUOUS LINE.

Not all counterfeit bank notes will fluoresce, if in doubt, check the watermark, the metallic strip, the print should be very clear with colours well defined.

6 Watt Blue Glass UV Fluorescent Lamp.
Protects against all GBP Notes.
Euro Currency Detection.

Credit cards.
Travellers Cheques.
CE Approved.
